DILUTION PROPORTIONS: 1g = 1L 10g = 10L 100g = 100L 1Kg = 1000L

Maximum yield, maximum resin production, minimum effort.

Grow

N-P-K: 24-6-12

Designed specifically for the vegetative growth-stage of all plants.

short Flowering

N-P-K: 16-6-26

Designed specifically for the growth and flowering stages of those plant varieties with a short flowering time, 8 weeks or less.

Hybrids

N-P-K: 15-7-22

Designed specifically for the growth and flowering stages of those plant varieties that originate from hybrid crosses with an intermediate flowering time, 8-9 weeks.

long Flowering

N-P-K: 18-12-18

Designed specifically for the growth and flowering stages of those plant varieties with a long flowering time, 9 weeks or more.
